USGS
NATIONAL RIVER & STREAM SURVEY

water 0.63

water 0.58

An aerial view of a water polo match in progress. The water is a greenish-brown color. A white wake from a boat is visible in the upper left corner. Several players are visible in the water, each with a yellow and black tracking overlay. The overlays consist of a small icon of the player and a black box containing the text "Goalkeeper 0.00" or "Goalkeeper 0.03". The players are scattered across the frame, with some closer to the center and others further out. The overall scene is a wide-angle shot of the pool.

This aerial photograph shows a large-scale disaster site, likely the aftermath of an earthquake. The ground is covered in a thick layer of rubble, including broken concrete, twisted metal, and debris. Numerous people are scattered throughout the scene, some standing in groups and others moving through the wreckage. Several small, semi-transparent boxes are overlaid on the image, each containing a label and a numerical value. The labels include 'civilian' and 'civilian' (repeated), and the numerical values range from 0.55 to 0.94. These labels and values are positioned near the individuals they identify, providing a visual representation of the model's confidence in its classification. The overall scene is one of chaos and destruction, with a hazy, smoke-filled atmosphere in the background.
